

Employer:

Cooperative Network Services

Category

OSP Engineering

Job Titles

Engineering Technician 1 / Inspector
Engineering Technician 2 / Resident

Job Description

Cooperative Network Services, LLC, is owned by fifteen (15) Cooperative Telephone companies, offering a wide range of services to its owners and the telecommunications industry at large. Its growing list of services presently includes: TDM and Ethernet transport, wholesale Internet, ASR assistance, data network consulting, network coordination and engineering services. CNS is beginning its search for two (2) full time, non-exempt (eligible for overtime) OSP engineers. The positions will be located in Menahga, Minnesota but the potential exists for remote employees as well in the future.

CNS engineering technicians assist our owners with numerous phases required for completion of OSP projects from inception through completion. A technician will work from the office and on project site as a CNS representative to direct project requirements and insure project specifications are met. You will be involved with OSP design, field staking preparations, utility permit applications, map assembly, specifications and contract creation, construction inspection and coordination and close out processing while maintaining communications with clients, contacting personnel and the CNS team.

Successful candidates will have a high school diploma; a technical telecommunication degree or equivalent experience preferred; basic computer skills (MS Word, Excel, Outlook) required; a solid working knowledge of RUS telecommunications cable plant terminology and construction methods are preferred. Excellent verbal and written communications skills required. Valid driver's license and an excellent DMV history required. The candidate will be required to travel and stay at a project site for an extended period of time.

CNS offers a competitive compensation and employee benefit program, including Health (H S A compatible), H S A and Dental insurances, short/long term disability, life, 401K, Flex plan, PTO, Holidays, vehicle and tools. Olsen Thielen & Co., Ltd. is assisting CNS with the search to fill these OSP engineering tech positions. Forward resume and salary requirements in confidence to: alanholz@otcpas.com or fax to 651 483-5421.
